

# Orange Tree Events

## **CIRCUS SKILLS**

An indoor event which provides a strong team building theme with elements of learning skills, communication, leadership, buddying etc. but most important loads of FUN !

### **EVENT FORMAT**

Delegates shouldn't have a prior knowledge of the challenges they face - surprise is a key element. The first ten minutes are spent setting the parameters for successful team working. This is humorous and designed to put delegates at their ease. Quite naturally delegates will be scared of failure and of looking silly when facing these particular challenges so they will need to create a supportive learning environment in which they are prepared to:

- Share the skills they learn
- Ask each other for help
- Acknowledge each other's achievements.

The delegates are then split into three and are asked to assemble at the three skill stations:

1. Juggling
2. Plate Spinning
3. Flower Stick and Diabolo.

Each group in turn are then coached in their respective skills with the other groups looking on. T

They observe how some will learn to juggle in less than a minute, just how addictive spinning a plate on a stick can be and how it is possible to look incredibly bold when using the flower stick despite having no skill at all.

After a suitable period of practice each group rotates onto the next skill station until everyone has experienced each skill. Then each group are asked to take centre stage and demonstrate their new found skills to the two other groups.

The event culminates in china plate spinning which focuses the mind and can lead to a smashing finale.

This is carried out in a controlled, safe environment and makes for a rousing end to the event.
